Ermesinde, Porto, Portugal

Professional Summary

I am a Junior Full Stack Developer with hands-on experience in developing modern web applications using technologies such as HTML, CSS, JavaScript, React, Angular, PHP, Supabase, PocketBase, and AWS. I have solid experience in API integrations, user authentication, and creating scalable, efficient solutions.

I am seeking my first professional opportunity in the development field, where I can apply my technical skills and grow alongside an innovative team. Always learning, with active projects on my online portfolio.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, React, Bootstrap
- **Backend:** PHP, Node.js, SQL, Java, Supabase, PocketBase
- **Additional Languages:** C, C++
- **DevOps/Cloud:** AWS (deploy), Git, GitHub
- **Tools:** Postman, Figma, REST APIs, Visual Studio Code

Interpersonal Skills

- Clear and objective communication
- Attention to detail
- Analytical thinking
- Quick learner
- Organization and autonomy
- Teamwork in multidisciplinary environments
- Adaptability and resilience

Relevant Projects

Personal Portfolio — github.com/Nuno08/Portfolio

HTML, CSS, JavaScript, AWS. Responsive website to showcase projects and contacts, hosted on AWS (EC2/S3).

Transport Guide — github.com/Nuno08/Guia-Transporte

PHP, Supabase, HTML, CSS, JavaScript. Application for transport forms with predefined products; sends data to Supabase and generates a customized PDF.

Login System — github.com/Nuno08/Login

PHP, Supabase, HTML, CSS. Authentication built from scratch; passwords secured with `password_hash()` and `password_verify()`.

Relevant Professional Experience

Development Intern | Goldylocks • Jan 2020 – Jul 2021

During my internship at Goldylocks, I worked on developing web applications using HTML, CSS, JavaScript, and React. I was also responsible for creating mockups for interfaces, ensuring the design met user requirements and was intuitive. I actively contributed to API integrations, performing performance tests and validation with Postman. Additionally, I was in charge of detecting and fixing bugs in the company's financial software, ensuring its stability and performance. I used Git for version control, promoting an efficient development workflow.

Development Intern | Zilevo • May 2018 – Jun 2019

At Zilevo, I was responsible for creating interface prototypes and static web pages using HTML, CSS, and JavaScript. I also supported the development team by fixing bugs and implementing new features, which allowed me to improve my ability to identify and resolve problems quickly and efficiently. I learned to collaborate effectively in an agile environment and manage multiple tasks simultaneously.

Academic Background

CTeSP in Programming and Information Systems Technologies — Polytechnic Institute of Viana do Castelo (2019 – 2023)

Vocational Course in Management and Programming of Computer Systems — Secondary School of Santa Maria Maior (2017 – 2019)

Certifications

HackerRank (Intermédio): JavaScript, Angular, SQL, Node.js, Problem Solving, Software Engineering

“Viver de Código” – Frontend Course: HTML, CSS, JavaScript, Git, Figma, UI/UX Design
